

FACT SHEET

Our mission is to make computational research a connected community that together drives for faster, more collaborative, higher quality discoveries.

About the product

Code Ocean is where great computational research is created, organized, and shared in one place. Research and development organizations benefit from lower IT costs, automation to operationalize reproducibility, and saving wasted researcher and collaboration time.

The Code Ocean integrative computational research experience and unique Compute Capsule are the best way to standardize research workflow, and track and reproduce all computations and discoveries. Our community in academic research, leading publications, and life sciences companies each play a part in driving discoveries forward. We are dedicated to closing their technology gaps and achieving higher quality discoveries.
