

## Ram Dayan

### CTO

Ram Dayan is a co-founder and CTO of Code Ocean, a cloud-based computational research platform for quickly creating, organizing and sharing project-based code, data, the environment and the results. Together with a founding team built the Code Ocean platform using cutting edge technologies, bringing in his vast over 30 years programming experience in different fields in the industry, from real-time data processing applications to advanced driver assistance systems. He was leading software development in Picitup, developing various image processing applications, and in iOnRoad, developing an augmented driving mobile app, which was later acquired by Harman International. Previously, he was involved in various development projects, providing Agile project management and software design consultancy.
